Big Bend GMD #5

In accordance with K.S.A. 82a-1041, Big Bend Groundwater Management District #5 ("District") is pursuing a Local Enhanced Management Area ("LEMA"). On February 15, 2018, the District board presented the key components of the draft LEMA plan at the annual meeting. These components are: 1) end gun removal within entire LEMA area, 2) implement streamflow augmentation at a rate of 15 cubic feet per second ("cfs"); and 3) promote movement or retirement of water rights out of sensitive areas of the LEMA. The draft LEMA document is available for public review and comment. Please use this form to submit comments and concerns to the District by **March 1, 2018**.

Name (optional): Richard Rugan

Contact Info (optional): 620-786-0934

I believe endgun removal would be an option. Also I think the MDS wells should most definitely be the first to be reduced or shut off if an impairment is filed according to the language they agreed to when drilling these wells. I don't believe that the mystery river should be included the LEMA. Does the Zenith Station have flow meters or are they not held to the same standards as irrigators are. How did and when did Quivera Refuge perfect there water rights. (in a wet time period?? in a timely matter or years later??)

I am sending this objection to the LEMA at this time for the following water right file numbers 34719, 34720, 34721, 38713

Darrell Wood - Edwards (Pres.)
Fred Grunder - Pratt (V Pres.)
John Janssen - Kiowa (Treas.)
Jerry Cullop - Rice (Sec.)
Justin Gatz - Reno
Kent Lamb - Stafford
Phil Martin - Barton
Kerry Froetschner - Pawnee
